Forecast for Friday 21 Jun 2024

Weather: Mainly dry with some sunny spells, perhaps the odd light shower breaking out mid-afternoon. Cloud lowering and becoming more widespread through the evening with some rain or drizzle, heaviest and most persistent over western Fells.

Chance of cloud-free hill tops above 800m: 90% falling to 70% through the day, and 30% or less in the late evening.

Low cloud and visibility: Generally clear skies with the odd fog patch in valleys at first. Patchy cloud down to 700-900m pushing in through mid-morning, with the best of the clearer skies towards northern and eastern Fells. Widespread low cloud down to 300-500m arriving through the evening, with poor visibilities in rain, drizzle or hill fog.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Windy conditions will make for fairly arduous walking on exposed terrain with buffeting of clothing. Balance may be affected at times. Note the deterioration in conditions through the evening where low cloud and poor visibilities will make navigation more challenging.

Forecast for Saturday 22 Jun 2024

Weather: Extensive low cloud with outbreaks of rain or drizzle in the early hours will soon clear away east. Then a predominantly dry day with some sunny spells. Low cloud and light drizzle arriving again in the late evening.

Maximum wind: Southwest 15mph, rising to 20-25mph gusting 30-35mph on the highest summits in the late evening.

Chance of cloud-free hill tops above 800m: 90% or more for much of the day, falling to 30% or less before sunrise and after sunset.

Low cloud and visibility: Clear summits and excellent visibilities for most of the day, but extensive low cloud down to 300-500m and drizzle before sunrise and again after sunset.

Temperature: **Valleys:** Plus 12 rising to plus 16 Celsius.
At 800m: Plus 7 Celsius.
Freezing level: Above summits.
